

## Revolutionizing How Company Knowledge is Retained and Shared

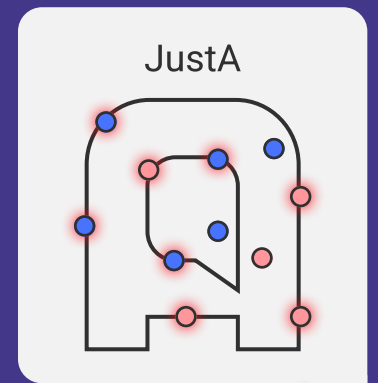

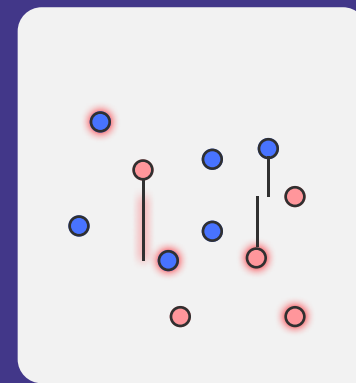

Rapid technological advances are making knowledge management increasingly difficult.

Creating organizational knowledge is a critical key to staying competitive in any market, but it is constantly lost in the chaos of employee turnover, poorly-selected SMEs (Subject Matter Experts) and a complicated web of disjointed systems and sources.

### That's Where We Come In

JustA is a 24/7 virtual knowledge assistant that works harder, faster and smarter for your team.

We use cutting-edge technologies to create one centralized virtual library of all company knowledge sources, from analyzed databases to verified SMEs, and serve it back up as intuitive suggestions from a non-invasive desktop application. JustA continuously and automatically absorbs new intel, becoming smarter in its abilities to preemptively offer up personalized solutions, while keeping data securely encrypted from end-to-end.

### What We Offer

JustA improves workflow and increases productivity, making it a powerful resource-saving tool for companies in a diverse range of industries.
